- **Technical Skills:** Microsoft Office suite; Google Workspace tools; Canva; C, CSS, Java, JavaScript, PHP, Assembly Language and HTML5; MySQL Database; Experienced with NetBeans IDE, Logisim, Figma, Packet Tracer, GitHub, and Git version control.

PROJECTS

ChaWrap: Supply Inventory Database Management System

March – May 2024

- Developed a comprehensive system featuring a dashboard that displays daily total customers and earnings, inventory summary, best seller of the month, and upcoming events.
- Created an ERD model of the MySQL database to support efficient data management and storage, and managed inventory with both manual adjustments and automatic updates when orders are placed.
- Integrated the Figma prototype with PHP, JavaScript, HTML, and CSS to create a fully functional and dynamic web system and for POS system that handles orders and display all transactions.
- Enabled reports for daily and monthly summaries to provide insights into business performance.

iTravel: Bus Ticketing System

November – December 2023

- Designed a Java NetBeans Application that assists the admin in recording and monitoring the passengers in each bus.
- Integrated a MySQL Database that stores and manages the passenger information.

CliniSys: Healthcare Management System

September – December 2023

- Designed a Figma Prototype that manages and monitors healthcare appointments, records, and transactions for admin account type.
- Spearheaded the creation of prototypes through paper and Figma.
